

Lap Joint Exhaust Band Clamp

Description:

Lap Joint Exhaust Band Clamp Universal for Exhaust Pipe Connection

Specifications:

Type: Lap Joint Band Exhaust Clamp

Material: SS304 polished, SS201 polished SS409, Aluminized steel

Color: Silver

Fitment Type: Performance/Custom

Size and part numbers are as below:

Size	Bright 304 Stainless steel	409 Stainless Steel	Aluminized Steel	201 Stainless Steel
2"	LP304200	LP409200	LPAS200	LP201200
2 1/4"	LP304214	LP409214	LPAS214	LP201214
2 1/2"	LP304212	LP409212	LPAS212	LP201212
2 3/4"	LP304234	LP409234	LPAS234	LP201234
3"	LP304300	LP409300	LPAS300	LP201300
3 1/2"	LP304312	LP409312	LPAS312	LP201312
4"	LP304400	LP409400	LPAS400	LP201400
4 1/2"	LP304412	LP409412	LPAS412	LP201412
5"	LP304500	LP409500	LPAS500	LP201500

Installation:

Step 1

Position 1/3 to 1/2 way onto the larger diameter tube or to completely cover slots.

Step 2

Manually fold the clamp ends to approximately 90 degrees. Insert foil gasket in gap and insert bolts into holes.

Step 3

For all flat band seal clamps, tighten the bolt versus the nut and alternate between fasteners several times to uniformly take up the slack.
