

Stainless Steel Turbo Exhaust Clamp

Description:

Stainless Steel Turbo Exhaust Clamp for Exhaust
Pipe Installation

Specifications:

Type: Stainless steel Turbo Exhaust Clamp

Material: SUS304

Color: Silver

Fitment Type: Performance/Custom

Size and part numbers are as below

Size	SUS304	Aluminized Steel
2"	TC304200	TCAS200
2 ¼"	TC304214	TCAS214
2 ½"	TC304212	TCAS212
2 ¾"	TC304234	TCAS234
3"	TC304300	TCAS300
3 ½"	TC304312	TCAS312
4"	TC304400	TCAS400
4 ½"	TC304412	TCAS412
5"	TC304500	TCAS500

Installation:

Step 1

Position 1/3 to 1/2 way onto the larger diameter tube or to completely cover slots.

Step 2

Manually fold the clamp ends to approximately 90 degrees. Insert foil gasket in gap and insert bolts into holes.

Step 3

For all flat band seal clamps, tighten the bolt versus the nut and alternate between fasteners several times to uniformly take up the slack.
